SERVICENOW

Employee Laptop Request

SCENARIO

Submitting, approving, tracking and fulfilling an employee laptop request

	ENTICE How does an employee become aware of the request process?	ENTER What does the employee experience at the beginning?	ENGAGE What happens during the core request process?	EXIT What happens when the laptop request is fulfilled?	EXTEND What happens after fulfillment?
S **STEPS** What does the employee typically experience at each step?	**Open portal** Employee opens ServiceNow portal and selects the Laptop Request catalog…	**View request** Employee sees a clear request form and the information needed…	**Enter details** Employee enters required details such as business reason, location and…	**Review** Employee checks the entered information before submitting.	**Submit request** Employee submits the request and the system creates a unique reference…	**Validation** ServiceNow validates required information and prepares the request…	**Approval** The request is routed to the appropriate manager or approver.	**IT processing** Approved request is assigned to IT for review, device availability and fulfillment.…	**Laptop assigned** IT prepares and assigns the laptop and updates the fulfillment task.	**Notification** Employee receives updates about approval, progress and fulfillment.…	**Track request** Employee can view current status and request history in ServiceNow.…	**Close / support** Request is completed; employee can refer to the record for…
I **INTERACTIONS** People, places, things and digital touchpoints used at each step	Employee Portal / Service Catalog	Laptop Request catalog item	Form fields and validation	Review screen	Submit action + request number	Automated workflow	Manager approval	IT fulfillment task	Asset / device information	Email or in-platform notification	Request status/history	IT support path
G **GOALS** At each step, what is the employee's primary goal or motivation?	Help me find the right place to request a laptop.	Help me understand what information is required.	Help me submit complete information quickly.	Help me avoid mistakes before submission.	Help me know my request was created successfully.	Help me avoid manual follow-up for validation.	Help me get approval without delays.	Help me receive the correct laptop efficiently.	Help me know when the laptop is ready.	Help me stay informed without repeated emails.	Help me see what is happening with my request.	Help me complete the process and know where to get support.
P **POSITIVE** What feels productive, motivating, reassuring or useful?	Clear portal entry point	Simple structured form	Required fields guide the user	Review reduces mistakes	Immediate confirmation	Automated routing	Transparent approval state	Organized IT task	Clear fulfillment outcome	Useful notifications	Status visibility	Complete request history
N **NEGATIVE** What feels frustrating, confusing, costly or time-consuming?	Request item may be hard to find	Unclear field labels can confuse	Too many fields may slow entry	Manual checking can be tedious	Uncertainty after submission	Incomplete data can cause delays	Approval delays	Inventory uncertainty	Manual updates may be missed	Too many notifications	Repeated status questions	No clear support route
O **OPPORTUNITY** How might we make each step better?	Use clear catalog categories and search terms.	Provide concise instructions and examples.	Keep only necessary fields and use validation.	Add a simple confirmation/review step.	Show reference number and expected next step.	Automate validation and routing.	Use approval reminders and escalation.	Connect asset/inventory information where available.	Standardize fulfillment task updates.	Send event-based notifications only.	Provide a self-service status view.	Keep history and support information accessible.
