Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	09 september 2026
Team ID	
Project Name	ServiceNow-Based Employee Laptop Request Application
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Laptop Request Management	Access Laptop Request FormSelect Laptop TypeEnter Request DetailsSubmit Laptop Request
FR-2	Request Approval	Manager ReviewApprove RequestReject Request with Reason
FR-3	Request Tracking	View Request StatusTrack Request ProgressView Request History
FR-4	IT Fulfillment	Check Laptop AvailabilityAssign LaptopConfigure LaptopUpdate Fulfillment Status
FR-5	Notifications	Request Submission NotificationApproval / Rejection NotificationFulfillment Notification
FR-6	Asset Management	Record Laptop Asset DetailsLink Asset to EmployeeUpdate Asset Assignment
FR-7	Request Closure	Employee ConfirmationUpdate Completion StatusClose Completed Request
FR-8	Administration & Reporting	Manage Request FormConfigure WorkflowMonitor RequestsGenerate Reports

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The application should provide a simple and user-friendly interface for employees to submit and track laptop requests.
NFR-2	Security	The application should ensure that only authorized users can access, submit, approve, and manage laptop requests.
NFR-3	Reliability	The system should process laptop requests accurately and maintain request information without data loss.
NFR-4	Performance	The application should respond quickly when employees submit, view, or track laptop requests.
NFR-5	Availability	The application should be available to employees, managers, and IT support whenever laptop requests need to be submitted or processed.
NFR-6	Scalability	The system should support an increasing number of employees, laptop requests, and IT operations without affecting performance.
